

PACE-Monmouth Computer Science

Objective:

1. Identify all **Inputs** and **Outputs** for the problem presented below
2. Identify any **constants** that might be required
3. Identify any **key formulas** required
4. Identify any "**placeholders**" needed to store temporary computations
5. Write a set of **pseudo-code** statements that will solve the problem

Problem Statement: Write a program to ask the user for the numerical grade they received on a test. If the grade is 65 or above, indicate that they passed. If the grade is below 65, then they failed the test.

Inputs:

Outputs:

Constants:

Key Formulas:

Placeholders:

Pseudo-Code:
